today 23-12-2025

what we did today :
add new arch in create projects and restructure it
add msgpack reading tool
what to do tomoorow:
make the editing work with the new arch
add backend
use rabbit mk or nats in realtime server
add payment with nowpayment
search for better stack for export cuz think react could be slow
finish restructure all the routes
move the multy user editing to realtime folder script
